## Investment Strategy

DJE - Multi Asset & Trends is a dynamic global multi-asset fund. The diversified portfolio of approximately 50 to 70 equities and between 20 to 40 bonds is managed independent from any benchmark. The fund management pursues a thematic approach to benefit from current and long-term trends, including digital transformation, demographics & health, and clean technologies. The strategy targets companies with stable business models and above-average growth prospects, combined with reasonable valuations. Additional diversification is achieved by investing in up to 10% of the portfolio in gold. The fund seeks to exploit global opportunities to generate an attractive performance.

## Performance in % since inception (27/01/2003)

Source for all performance data: Anevis Solutions GmbH, own illustration. As at: 16/05/2024.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method<sup>2</sup> and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 4.00%, he has to spend a one-off amount of Euro 40.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

### Evaluation by MSCI ESG Research

MSCI ESG Rating (AAA-CCC)	A
ESG Quality Score (0-10)	7.0
Environmental score (0-10)	6.1
Social score (0-10)	5.3
Governance score (0-10)	5.8
ESG Rating compared to Peer Group (100% = best value)	35.73%
Peer Group	Mixed Asset EUR Agg - Global (431 Funds)
ESG Coverage	87.08%
Weighted Average Carbon Intensity (tCO <sub>2</sub> e / \$M sales)	120.24

AAA	11.69%	BB	5.80%
AA	30.24%	B	1.63%
A	24.03%	CCC	0.00%
BBB	13.70%	Not Rated	12.92%

### ESG Rating What it means

AAA, AA	<b>Leader:</b> The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	<b>Average:</b> The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	<b>Laggard:</b> The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

### Investment Approach

The asset allocation of the DJE - Multi Asset & Trends fund follows a consistent bottom-up approach. It is based on fundamental factors such as market positioning, balance sheet and earnings potential, valuation, management quality, and sustainability criteria. The fund management takes a flexible approach to asset classes and allocates across sectors and countries with the aim of managing risk and capitalising on opportunities that arise. Gold is an asset class that has a low correlation with equities and bonds and provides additional stability; it can represent up to 10% of the fund. With the growth-oriented risk-reward profile and broad diversification across different asset classes, the fund aims for attractive returns combined with low volatility.

#### INVEST IN TODAY'S MEGATRENDS AND TACTICAL THEMES

Source: DJE Kapital AG. For illustrative purposes only.

#### Opportunities

- + Offensive, theme-oriented, global multi-asset fund with ongoing adjustment of its portfolio to the expected market situation.
- + Equities enable participation in the growth opportunities of the global equity markets independently of benchmark index specifications.
- + Flexible addition of bonds (up to 50%) and other securities such as certificates on precious metals (up to 10% gold) possible.
- + The cash quota (up to 49%) can be used flexibly in order to cushion difficult market phases as much as possible.

#### Risks

- Share prices can fluctuate relatively strongly due to market, currency and individual value factors.
- Bonds are subject to price risks when interest rates rise, as well as country risks and the creditworthiness and liquidity risks of their issuers.
- In the case of securities not denominated in euros, there is a currency risk for euro investors.
- An investment in precious metals is subject to fluctuations in value.

### Fund Manager

**Moritz Rehmann**

Responsible Since 23/01/2017

Moritz Rehmann joined DJE in 2005 and is an analyst responsible for the banking, insurance and technology sectors. The business economist has been fund manager of DJE - Multi Asset & Trends since 2017 and a member of the DJE strategy team since 2021, which, among other things, determines the allocation of asset classes and sectors.

### DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

### Monthly Commentary

After a strong first quarter, the international stock markets largely went into reverse in April. The German share index DAX closed the month down -3.03%, while the broad European share index Stoxx Europe 600 fell by only -1.52%. In the USA, the S&P 500 fell by -3.11%. By contrast, Hong Kong's Hang Seng Index provided a counterpoint, rising by 8.63%. Overall, global equities, as measured by the MSCI World, fell by -2.86% - all index figures in euro terms. The equity markets were burdened above all by the development of US inflation. In March, the inflation rate rose to 3.5% (February: 3.1%) compared to the same month last year. The US economy grew by 1.6% in the first quarter compared to the previous quarter - weaker than expected, but significantly stronger than the eurozone, whose economy grew by 0.3% and was thus able to avoid a technical recession. As a result, expectations for interest rate cuts in the US declined even further and largely changed to the view that the US key interest rate plateau would remain at the current level of 5.25 to 5.50% for the time being. For the eurozone, however, the markets continue to expect a rate cut in June. The markets were also kept on tenterhooks by Iran's attack on Israel and the Israeli response, which caused the VIX volatility index to spike to its highest level of the year and briefly drove up the oil price. The price of gold also continued to rise: over the course of the month, the troy ounce gained 2.53% to USD 2,286.25, but traded at USD 2,390 in the meantime. With the correction on the equity markets, risk premiums for corporate bonds and US high-yield bonds widened on the bond markets and interest rates for 10-year US Treasuries rose. The DJE - Multi Asset & Trends fell by -1.31% in this market environment. On the global equity market, only four sectors were able to escape the negative trend and end the month with a positive result: Basic Materials, Utilities, Energy and Food & Beverages. The weakest results were delivered by the property, media, telecommunications and consumer goods & services sectors. On the other hand, the fund benefited in particular from its stock selection in the property sector. The personal care, drugstore & food, energy and basic materials sectors also delivered pleasing results. The strongest individual stocks included the British-South African mining group Anglo American, the property developer China Resources Land and the internet group Tencent (both China). By contrast, the Indonesian bank Rakyat Indonesia, the US financial services provider MSCI and the Japanese temporary employment agency TechnoPro (specialising in the technology sector) were among the disappointing performers. Among other things, the fund management increased the weighting of the insurance and energy sectors and reduced the technology and financial services sectors. As a result, the equity allocation fell moderately from 68.03% to 66.81%. On the bond side, the broad rise in yields weighed on the fund's performance. Nevertheless, the bond ratio remained almost unchanged at 23.57% (previous month: 23.41%). The gold certificate made a positive contribution to performance. The fund management increased the precious metal ratio from 7.05% to 7.84%. The fund's liquidity rose from 1.51% to 1.78%.
