### Investment Strategy

The fund invests globally, primarily in equities and bonds, and completely independent from benchmark requirements. The asset allocation of is based on the FMM methodology with equities being the main focus. The FMM-Fonds was launched in 1987 it was the first fund managed by an independent asset manager in Germany. FMM stands for the following market indicators: fundamental, monetary and market sentiment. The fund invests both in value stocks and in promising growth companies. All the companies are required to meet the strict analytical criteria of the FMM methodology.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method<sup>2</sup> and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 5.00%, he has to spend a one-off amount of Euro 50.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

1 | The fiscal treatment depends on the personal circumstances of the respective client and can be subject of change in the future.

# FMM-Fonds P (EUR)

Germany's first fund with an independent wealth management approach

### Evaluation by MSCI ESG Research

MSCI ESG Rating (AAA-CCC)	AA
ESG Quality Score (0-10)	7.3
Environmental score (0-10)	6.0
Social score (0-10)	5.8
Governance score (0-10)	6.1
ESG Rating compared to Peer Group (100% = best value)	46.17%
Peer Group	Mixed Asset EUR Agg - Global (431 Funds)
ESG Coverage	86.50%
Weighted Average Carbon Intensity (tCO <sub>2</sub> e / \$M sales)	242.76

AAA	18.54%	BB	0.29%
AA	25.81%	B	1.28%
A	27.89%	CCC	0.00%
BBB	12.70%	Not Rated	13.50%

### ESG Rating What it means

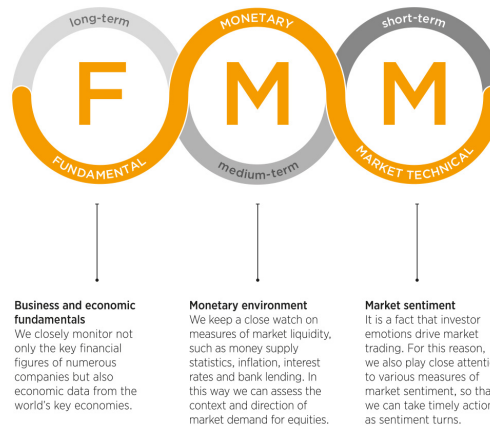

AAA, AA	<b>Leader:</b> The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	<b>Average:</b> The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	<b>Laggard:</b> The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

### Investment Approach

The FMM-Fonds is an investment concept which is managed independently of any benchmark constraints with the aim to achieve an optimal risk/reward profile. The basis is the three-dimensional FMM-methodology, which was developed by Dr Jens Ehrhardt and has a proven track record of approx. 50 years. According to the methodology the following factors are taken into account: (F)undamental factors like micro- and macroeconomic data for corporations and economies, but also (M)onetary and technical (M)arket aspects such as sentiment which are often neglected by other fund managers. Fundamental factors play a more important role in the long-term strategic orientation of the portfolio than, for example, technical market factors. The latter are more significant for the fund's short-term, tactical positioning. In normal market phases, the FMM-Fonds focuses on current trends. In extreme situations (such as during euphoric phases), the fund can also follow an anticyclical investment strategy.

### The essential parts of the FMM methodology

**Business and economic fundamentals**  
 We closely monitor not only the key financial figures of numerous companies but also economic data from the world's key economies.

**Monetary environment**  
 We keep a close watch on measures of market liquidity, such as money supply statistics, inflation, interest rates and bank lending. In this way we can assess the context and direction of market demand for equities.

**Market sentiment**  
 It is a fact that investor emotions drive market trading. For this reason, we also play close attention to various measures of market sentiment, so that we can take timely action as sentiment turns.

Source: DJE. For illustrative purposes only.

### Opportunities

- + Flexible, asset-managing management through active adjustment of the fund structure to capital market conditions
- + Experienced fund manager following an investment approach based on fundamental, monetary and market-technical analysis (FMM), which has a proven track record since DJE was founded in 1974
- + Participation in the growth opportunities of the global stock markets unconstrained of benchmark index parameters

### Risks

- The value of an investment can go up or down and you may not get back the amount invested.
- The FMM method does not guarantee investment success
- Equity prices may exhibit strong volatility depending on market conditions
- Bonds are subject to price risks when interest rates rise, as well as country risks and the credit and liquidity risks of their issuers

## FMM-Fonds P (EUR)

Germany's first fund with an independent wealth management approach

### Fund Manager

**Dr. Jens Ehrhardt**

Responsible Since 17/08/1987

Dr Jens Ehrhardt is the founder and CEO of DJE. He received his doctorate in 1974, the same year he founded today's DJE Kapital AG, which he has managed from the outset. From his doctorate, he developed the DJE investment method, FMM, which has been continuously refined to this day and takes fundamental, monetary and market indicators into account.

### DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

### Monthly Commentary

After a strong first quarter, the international stock markets largely went into reverse in April. The development of US inflation was a particular burden. In March, the inflation rate rose to 3.5% (February: 3.1%) compared to the same month in the previous year. The US economy grew by 1.6% in the first quarter compared to the previous quarter - weaker than expected, but significantly stronger than the eurozone, whose economy grew by 0.3% and was thus able to avoid a technical recession. As a result, expectations for interest rate cuts in the US declined even further and largely changed to the view that the US key interest rate plateau would remain at the current level of 5.25 to 5.50% for the time being. For the eurozone, however, the markets continue to expect a rate cut in June. What also kept the markets on tenterhooks was Iran's attack on Israel and the Israeli response, which caused the VIX volatility index to spike to its highest level of the year and briefly drove up the oil price. The FMM fund fell by -1.15% in this market environment. Its benchmark index lost -2.77%. On the global equity market, only four sectors were able to escape the negative trend and end the month with a positive result: Basic Materials, Utilities, Energy and Food & Beverages. The weakest results came from the property, media, telecommunications and consumer goods & services sectors. The strongest individual stock results came from the utilities Fortum (Finland) and RWE (Germany), the British pharmaceutical company AstraZeneca and the Finnish Nordea Bank. On the other hand, the reinsurance company Münchner Rück, Allianz, Deutsche Telekom (all three: Germany) and the German-American industrial gases manufacturer Linde (headquartered in Dublin), among others, were disappointing. Over the course of the month, the fund management increased the weighting of the utilities, energy and industrial sectors. In turn, it reduced the technology, insurance, financial services, chemicals and healthcare sectors. As a result of the adjustments, the fund's equity allocation fell from 75.06% to 66.94%. The bond ratio remained virtually unchanged at 11.30% (previous month: 11.69%). The certificate ratio fell from 9.64% to 7.72%. Liquidity, on the other hand, was increased from 2.61% to 13.52%.

### Legal Information

This is a marketing advertisement. Please read the prospectus of the relevant fund and the key information document (PRIIPs KID) before making a final investment decision. This also contains detailed information on opportunities and risks. These documents can be obtained free of charge in German at [www.dje.de](http://www.dje.de) under the relevant fund.
